What is Water ?

When scientists wonder whether there is life on other planets, they often ask this question "is there water there?" life as we know it would be impossible without water. Water is a tasteless, odourless. colourless compound that makes up a large proportion of all living things.

It occurs everywhere in the soil and exists in varying amount in the air. When hydrogen is burned in oxygen, water is formed. At 0 degree centigrade, or 32 degrees to solid. At 100 centigrade or 212 degrees Fahrenheit water changes from the liquid to gaseous

This process is called evaporation. The body of a human being contains about 47 liters of water. Water is a matter which exist in three stages: liquid—water, solid Ice, Gas-water vapour.

Trip to KVT.....

Riddle 1

I am a geometric solid.
I have six faces.
All my faces are squares.
What am I? (cube)

Riddle 2

I am a geometric solid.
I have two surfaces.
My base is formed by a circle.
I come to a point at the top.
What am I? (cone)

Riddle 3

I am a polyhedron.
I have the fewest number of
faces of all the polyhedrons.
All of my faces are triangular.
I come to a point at the top.
What am I? (triangular)

Eco-Buddy Club ...Drip Irrigation

We began this project Drip irrigation by January, 2019. We began this project by seeing the area where we want to do this. We continued this project with the help of three teachers and senior classes. Then we counted the number of plants in our campus. Then we bought the pipes that are used to supply water. Then we decided the path where to pipe it. Then we kept the pipes. Then we classified that there is no knots are there in the pipes. Then we fit the new types of taps that are used in the pipe. Then we done holes in the pipe leaving some gap between them as ever plant gets water in same amount. At last, we opened the tap and got the success.

MORE INFORMATION ABOUT DRIP IRRIGATION

1. Drip irrigation is one of the best process of providing water to plants in the country India.
2. In drip irrigation we can also use big pipes.
3. It is used to give water to many plants and reduces handwork of man.

MORE INFORMATION ABOUT DRIP IRRIGATION DONE BY OUR SCHOOL

1. There are around 175 plants in our school campus.
2. 116 people helped in this project.
3. we covered about 900 meters
